Summary

Data and AI professional with 8+ years of experience delivering analytics, business intelligence, data engineering, and Generative AI solutions across autonomous mobility, consulting, energy, healthcare, and technology domains. Proven expertise in stakeholder management, operational analytics, predictive modeling, cloud-based data platforms, dashboard development, and AI-powered insight generation. Experienced in translating business requirements into scalable analytics solutions that improve operational efficiency, product performance, and executive decision-making.

Skills

- **Machine Learning** — Model Evaluation, Classification, Regression, Clustering, Forecasting, Recommendation Systems
- **Data Analytics** — MySQL, R, Python,Tableau, Power BI, Bigquery ,looker , Google cloud
- **Product & Business Analytics** — Product Analytics, KPI Design, Stakeholder Management, Agile, Scrum, User Story Development, Roadmap Planning, Business Strategy, Customer Journey Analytics
- **Data Science** — Python, Scikit-Learn, XGBoost, Pandas, NumPy, SciPy, NLTK, SpaCy, Statistical Modeling, Hypothesis Testing, A/B Testing
- **Generative AI** — Prompt engineering ,LLMs Application
- **Agentic AI** — Claude Code,N8N, MCP (Model Context Protocol),VS Code , Antigravity, Gemini,Vibe Coding

Work Experience

Cognizant, *Data Scientist* 11/2025 | Hyderabad, TN

Google Waymo – Operational Analytics

- Partnered with Waymo program managers, operations, and engineering to define operational KPIs and deliver analytics that enable data-driven decisions for autonomous vehicle operations.
- Built and maintained scalable analytical pipelines on Google Cloud Platform using GoogleSQL, F1 Query Engine, and PLx to monitor latency, throughput, productivity, quality, and completion metrics.
- Designed and optimized dashboards leveraging HELM Job, Task, and Event datasets to surface mission-critical operational insights for cross-functional stakeholders.
- Led end-to-end data validation, testing, and metric reconciliation to ensure reporting accuracy, governance compliance, and trust in operational metrics.
- Automated recurring reporting and alerting workflows to reduce manual effort and accelerate anomaly detection and incident resolution.
- Managed multiple high-priority analytics workstreams using Buganizer and Taskflow, aligning stakeholders on timelines, risks, and deliverables.

GreenLancer Energy Inc, *Senior Data Analyst* 01/2025 – 04/2026 | Detroit, MI, USA

- Designed and implemented end-to-end data architecture (MySQL, Power BI) and scalable medallion ETL pipelines processing 5M+ sales records monthly, improving reporting efficiency by 40%.
- Developed robust ETL processes and data models that supported executive dashboards tracking CAC, retention, LTV, and sales KPIs, contributing to a 15% reduction in customer acquisition costs.
- Built executive-facing dashboards and visualizations to surface actionable insights, enabling faster strategic decisions across marketing and sales teams.
- Delivered data-driven recommendations that improved operational planning and supported leadership in prioritizing growth initiatives.

Deloitte USI, *Lead Solution Advisor* 09/2021 – 11/2022 | Gurgaon, HR

- Led a team of five analysts to develop fraud detection and risk-monitoring solutions using SQL Server, Python, and Power BI.

- Reduced audit turnaround time by 30% through automated reporting and exception monitoring frameworks.
- Collaborated with finance and risk leaders to define key risk indicators and data-driven compliance controls.
- Eliminated over 200 manual review hours per month through workflow automation.
- Developed anomaly detection solutions that improved audit traceability and reduced review effort by 25%.

Tata Power Delhi Distribution Limited, 06/2019 – 09/2021 | New Delhi, India
Data Analyst – IT Business Analytics
- Built Azure-based data pipelines using PySpark and Azure Data Factory to process 10M+ smart meter records.
- Developed analytics solutions and Tableau dashboards that identified power theft and fraud patterns worth ₹3.5M annually.

NCR Corporation, 05/2018 – 06/2019 | Gurgaon, India
Big Data Engineer – Supply Chain Management
- Developed Hive-based data platforms supporting supply chain analytics and reporting.
- Implemented CDC pipelines that reduced data latency by 75% and improved data availability.

Tata Consultancy Services, *System Engineer* 09/2014 – 08/2017 | Bangalore, India
- Performed customer churn analysis that improved retention by 20%.
- Developed SQL and ETL solutions to automate reporting and streamline business processes.

Education

Master of Professional Studies in Analytics, 01/2023 – 06/2024 | Boston, MA, USA
Northeastern University

B.Tech, Electronics & Electrical Engineering, 09/2010 – 05/2014 | Bhubaneswar
KIIT University
CGPA-9.07/10

Courses

Applied Generative AI Bootcamp, *Nextleap* 09/2026 – Present

Post Graduate Program In Business Analytics And Business Intelligence , *Texas McCombs School of Business* 04/2019 – 04/2020 | India

Certificates

- Google Advanced Data Analytics
- Tableau Desktop Specialist

Projects

Weekly App Review Pulse — Groww
- Built a GenAI-powered customer feedback platform to convert Groww app reviews into actionable product insights.
- Automated review ingestion, cleansing, PII removal, and analysis across 1,200+ customer reviews.
- Used Qwen-27B LLM to identify key themes, extract user feedback, and generate weekly product pulse reports.
- Integrated MCP-based Google Docs and Gmail workflows to automate insight delivery and stakeholder communication.
- Developed a Streamlit dashboard to visualize customer sentiment, product issues, and recommended actions.

Technologies: Python, Groq API, Qwen-27B, MCP, Streamlit, Plotly, Prompt Engineering, Google Docs, Gmail, VS code , Claude Code
